ABHILASH KRISHNA SUSARLA

Bengaluru, India | +91 99457 55897 | aksusarla@gmail.com | aksusarla.github.io

EDUCATION

Birla Institute of Technology & Science, Pilani (Hyderabad Campus) **Nov 2022 to Jul 2026**
B.E. (Hons.) Mechanical Engineering, Minor: Finance

SKILLS

Analytics: Microsoft Excel (advanced), SQL, Python (Pandas, NumPy), Power BI, Google Sheets and Apps Script, data analysis and dashboarding
Finance: Financial modeling (IRR, DSCR, scenario and sensitivity analysis, 25-year cash-flow models), valuation (FCFF, FCFE, WACC)
Product and Strategy: PRD writing, GTM strategy, market research, personas and wireframes, North Star metrics, regulatory research, business development
Operations: Pipeline and project tracking, workflow automation, stakeholder and vendor coordination, SOPs and process documentation
AI and Design: Claude, ChatGPT, prompt engineering, Figma, Canva
Certifications: Google AI Professional, Google AI Essentials, Google Data Analytics (in progress)

PROFESSIONAL EXPERIENCE

Intern, Energy Transition (Central Org) | Zetwerk Manufacturing Businesses Limited, Bengaluru **Jul 2026 to Present**

- 1 of the first 3 hires in a new renewables sub-business unit with no playbook. Owned parts of modeling, regulatory research, legal coordination and consultant management, and built the systems the team runs on.
- Coordinated 50+ consultants as the team's single point of contact for inputs, timelines and follow-ups.
- Evaluated 2,500+ MW of deals in about 3 months and built the pipeline system tracking 100+ deals: master tracker, live views, management dashboard and an automated 08:00 IST daily email digest.
- Ran 1M+ scenarios through a Python engine on a 25-year IRR model, giving BD a negotiating range per deal.
- Cut a 20-page term sheet from days to under 3 minutes with Apps Script automation, priced on a landed-cost engine built from 80+ regulatory orders across 15 states.
- Audited 4 live financial models and caught material errors in tax lines, return calculations and DSCR covenants before they reached management.

Research Intern | WILP Intelligent Systems Laboratory, BITS Pilani **Jul 2025 to Dec 2025**

- Managed milestone planning, weekly progress tracking and documentation for an experimental reinforcement-learning project, reporting remotely to a supervising professor at RMIT through weekly, monthly, quarterly and final reports.
- Built a reinforcement-learning program in Python that solves mazes in a virtual environment, working with Raspberry Pi and Arduino.

Summer Intern | Dunlin AI (BITS Practice School-1), Remote **May 2024 to Jul 2024**

- Supported GTM content, outreach and market research for an AI-driven bookkeeping product, reaching out to about 50 Indian CPA firms serving US clients.

LEADERSHIP EXPERIENCE

Head of Department, Sponsorship & Marketing | StuCCAn (Students' Union), BITS Pilani Hyderabad **Jul 2024 to Jun 2025**

- Led sponsorship and marketing for Pearl '25, the flagship annual fest (10K+ footfall). Raised Rs. 81L+ across 50+ partnerships (Rs. 45L cash, Rs. 36L in-kind), among the highest-value editions on record.
- Ran a 30-member team on a sponsor-operations system I built, the single source of truth for all 50+ accounts.
- Improved sponsorship conversion by about 30% YoY with data-backed targeting on brand fit, audience overlap and ROI. Grew SBI's campus account 7.5x, from Rs. 2L to Rs. 15L.

Strategic Team Member, Campus Operations | Student Welfare Division Nucleus, BITS Pilani Hyderabad **2023 to 2025**

- Selected as 1 of 4 from 120+ applicants to work with the Chief Warden and Associate Dean on tech-led improvements for 5,000+ stakeholders across 12 hostels.
- Scoped and supported the SWD App rollout: Gate Pass cut peak exit waits from 30 to 60 min to zero, and the SWDPay wallet has about 5,000 daily users. Wrote 4 user manuals that standardized SOPs.

PROJECTS

SWD App: Gate Pass and SWDPay | *Product Requirements Document*

- Authored a retrospective PRD for a shipped campus product with about 5,000 daily users, covering personas, P0/P1/P2 priorities, success metrics, rollout strategy and proposed instrumentation.

LinkedIn Hiring Efficiency Analysis | *Python, SQL*

- Cleaned and analysed large-scale LinkedIn datasets to engineer hiring-efficiency metrics, and identified salary band, remote status and location as the 3 drivers of candidate attraction.
